

CORRIGENDUM

**Corrigendum to “Victorian Inspectorate Report to the Parliament of Victoria on Controlled Operations 1 July 2017 to 30 June 2018”
(published as “Controlled Operations Annual Report 2017-2018 – All agencies”)**

The Victorian Inspectorate (VI) regrets to advise that some statistical errors have been identified in this report. These errors and the corrected data are shown below. Please note the errors at items (1) and (2) were originally made in previous annual reports made by the VI (2015-2016, and 2016-2017).

- (1) On page 16, at Table 1, the number of authorities issued in 2015-2016 was incorrectly recorded as 131. Rather than representing the number of authorities issued during the period, this number instead represents the total number of authorities that were active at any stage during this time. The correct number for authorities issued in 2015-2016 is 100.
- (2) The number of authorities issued during 2016-2017 was incorrectly recorded as 141 on page 16 of the report. This number should instead read as 112.
- (3) Also on page 16, the number of authorities issued in 2017-2018 was incorrectly recorded as 137. Rather than giving the number of issued authorities, this figure represents the total number of authorities that were active during any part of 2017-2018. The correct number of issued authorities for the period is 111.
- (4) On page 17, the report incorrectly states there was a total of 136 authorities that were expired or cancelled during 2017-2018. The correct total number of authorities that were expired or cancelled for this period is 101. This figure comprises 93 that expired and a further 8 that were cancelled.

The VI apologises for any inconvenience caused.
